eThekwini Commitments on Sanitation	Is there a national sanitation policy?
	Is there one national sanitation plan to meet the MDG target?
	What profile is given to sanitation within the PRSP?
	Is there a principal accountable institution to take leadership?
	Is there one coordinating body involving all stakeholders?
	Is there a specific public sector budget line for sanitation?
	Is 0.5% of GDP allocated to sanitation?
	Is there a sanitation monitoring and evaluation (M+E) system?
	Do Institutional sanitation programs include gender aspects?

**In North Africa, Mauritania was the only country to have convened an AfricaSan3 Country Preparation Meeting. Owing to this and with the permission of the national team, for the purposes of this document, Mauritania data has been included in the West Africa Region.
 ***Somalia: It was not possible to hold national consultation meetings in Somalia due to the ongoing conflict in the country. One semi-autonomous state in the NE of the country (Puntland) was able to hold consultations and due to the relative peace in that state, it is willing and able to implement activities to scale up sanitation in the state. Results from the Puntland state consultation are included in all Africa eThekwini Monitoring to give an indication of the status of Sanitation in Somalia although they may not be completely representative of the whole country.
