Today I'm going to talk about shit. It's gross. And when it fills our land,

It makes us really sick. When was the last time someone in your family got sick?

You may think that's impossible, but let me tell you about Village Chief, Sok Chamroen.

He heard about new latrine technology $35 pour-flush latrines coming to his village.

Together they talked about latrines to the entire village. First in a large group then one by one at their homes.

Four months later, the 77th house of the 77 household village, built a latrine. Sok Chamroen proved the impossible possible.

Luckily there's something you can do: Make sure 100% of your villagers have a latrine.

So he talked to his Sanitation Teacher and they made a partnership.

This is not about me, and it's not about you, it's about the community, the children, and their futures. Will you join me?
