**Scaling Up Rural Sanitation and Hygiene**

- **Cambodia**: 27,600 households – including 2,330 poor households – gained access to sanitation under WSP’s sanitation marketing and financing program.
- **Philippines**: Tools and materials pre-tested in 3 regions.
- **Lao PDR**: Government supported in expanding rural sanitation using own budget to 10 districts in 2 provinces.
- **Indonesia**: Ministry of Health regulation on Community-Based Total Sanitation issued in March 2014, adopting WSP’s scaling up rural sanitation approach.
- **Vietnam**: Formative research and surveys for strengthening supply chains for scaling up rural sanitation.

**Creating Sustainable Services Through Domestic Private Sector Participation**

- **Cambodia**: 31 out of 145 licensed water operators supported on business development to improve service for 44,900 households in collaboration with Cambodian Water Supply Association.
- **Indonesia**: 8 districts from 3 provinces under large World Bank project set to participate in WSP’s initiative to professionalize community-based water organizations (CBOs).
- **Philippines**: 18 CBOs met performance indicators after receiving loans totaling US$166,000 from 5 financial institutions to finance expansion to serve additional 4,000 households.
- **Supporting Poor-Inclusive WSS Sector Reform**
  - **Cambodia**: National Operational Program Guideline for Scaling Up Rural Sanitation endorsed by Ministry of Health in April 2014.
  - **Indonesia**: MoH Guideline on Planning and Implementation of Rural Sanitation Programs published in February and disseminated based on WSP’s approach.
  - **Vietnam**: MoH Guideline on Planning and Implementation of Rural Sanitation Programs published in February and disseminated based on WSP’s approach.

**Targeting the Urban Poor and Improving Services in Small Towns**

- **Vietnam**: Poverty and sanitation access mapping for Ho Chi Minh City completed as preparatory baseline for World Bank project.
- **Indonesia**: Government adopted recommendations from WSP’s technical assistance on Septage Management Models and started a new initiative to pilot the models.

**Delivering WSS Services in Fragile States**

- **Vietnam**: US$50 million in new EU funding leveraged based on the new policy.
Scaling Up Rural Sanitation and Hygiene

**CAMBODIA**
- Government-led market development platform established to help scale up sanitation marketing

**INDONESIA**
- Application of community-based total sanitation e-learning implemented as an accredited distance learning program for the sector

**LAO PDR**
- Impact evaluation of rural sanitation conducted in collaboration with MoH and East Meets West Foundation

**THE PHILIPPINES**
- Linking social protection and anti-poverty program through integration of rural sanitation into the Conditional Cash Transfer and the Grassroots Participatory Planning and Budgeting Programs

**VIETNAM**
- Behavior change communications, supply chain strategies, toolkits developed; rural sanitation capacity building strategy completed for health system towards 2020 and action plan until 2016

Creating Sustainable Services Through Domestic Private Sector Participation

**CAMBODIA**
- Additional 20 water operators supported by a strengthened Cambodian Water Supply Association
- Government assisted in monitoring performance of water operators

**INDONESIA**
- Lessons learned from a partnership in innovative financing arrangements among local governments, CBOs and private sector integrated into large World Bank project

**THE PHILIPPINES**
- First ever nationwide database covering over 3,000 water service providers established
- Access to finance identified, pool of experts increased to over 50 to assist at least 45 water utilities

Supporting Poor-Inclusive WSS Sector Reform

**REGIONAL**
- Economics of Sanitation Initiative Toolkit piloted in several countries, finalized in advanced software version in 2015

**CAMBODIA**
- National Program for RWSSH supported to reach the universal sector target by 2025

**LAO PDR**
- Government supported to finalize a strategic human resources framework for scaling up rural sanitation and hygiene

**INDONESIA**
- Updated political economy of sanitation study published
- Country Diagnostics on WASH and poverty completed, feeding into development of strategies to improve service delivery for the bottom 40%

**VIETNAM**
- Can Tho City sanitation plan implemented

Targeting the Urban Poor and Improving Services in Small Towns

**REGIONAL**
- Regional study on increasing house connections to sewer systems completed in Indonesia and Vietnam

**INDONESIA**
- Study results on improving onsite sanitation to complement fecal sludge management improvement program disseminated, incorporated by new sewerage projects

**VIETNAM**
- Pilot provincial master plan for WSS services developed, accepted and institutionalized by the Government

Delivering WSS Services in Fragile States

**REGIONAL**
- In-depth study on peri-urban sanitation in PNG completed

**VIETNAM**
- Peri-urban services scoping study and stakeholder meeting for 4 Pacific countries carried out
